Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-3, 7, 8 and 26-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Eggers et al. '019. Eggers et al. '019 disclose an electrosurgical device comprising an elongated body (180), a least one arm (188) and an electrode (182) coupled to the arm. **Regarding claims 7 and 8** see element (192) and col. 18 lines 38-40.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the

subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eggers et al. '019. Eggers et al. '019 teach all of the limitations of the claims except the ceramic coating comprising alumina and titania and the thickness of the coating. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided a ceramic coating comprising alumina and titania of the desired thickness, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.

Claims 22-25 and 33-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eggers et al. '019 further in view of Abele et al. '311. Eggers et al. '019 teach all of the limitations of the claim except the electrode comprising a ceramic base material with a metallic coating. Abele et al. '311 teach that it is old and well known in the art to construct electrodes with a ceramic base material and metallic coating (col. 8 lines 62-64). To have provided the Eggers et al. '019 device with an electrode formed by a ceramic base and metallic coating would have been obvious to one of ordinary skill in the art at the time the invention was made, particularly in view of the teaching of Abele et al. '311 that such is an old and well known type of electrode design.

Response to Arguments

Applicant's arguments filed 4/26/02 have been fully considered but they are not persuasive.

Regarding the argument that no part of the Eggers et al. loop is perpendicular to the longitudinal axis of Eggers' assembly, in Figure 13 Eggers et al. clearly illustrates an embodiment of the device in which the loop is perpendicular to the longitudinal axis of the device.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
